

Landscape Rehabilitation & Gully Erosion Field Day

FOUR DAYS
FOUR LOCATIONS

Join us for one of four regional field days exploring key issues surrounding erosion and soil loss.

Learn how to implement practical solutions that will rehabilitate and enhance your property, and benefit your business.

During each field day you will:

- ✓ Learn from fellow landholders who are battling erosion and see the rehabilitation actions they are taking
- ✓ Learn about soil loss processes and ways to recognize erosion
- ✓ Gain practical tips on how to address erosion issues before they become a costly problem
- ✓ Learn the methods and associated costs of various erosion management and rehabilitation options
- ✓ Hear from industry specialists in Natural Sequence Farming (at Mt Ball, Waterford or Junee field days) and in stream bank erosion (at Hillview field day only)
- ✓ Construct a cheap, simple and effective porous check dam

Read about your field day presenters overleaf...

These events are supported by Fitzroy Basin Association through funding from the Australian Government and delivered through Reef Trust, and with the support of CHRRUP and Capricornia Catchments.

FIELD DAY OPTIONS

'MT BALL' Rubyvale
Tuesday 17 April

'WATERFORD' Capella
Wednesday 18 April

'JUNEE' Dingo
Thursday 19 April

'HILLVIEW' Glenroy Crossing
Saturday 21 April

See over for time
and RSVP details.

**Morning tea, lunch
and water supplied.**

Please advise of any dietary requirements at time of booking.

**BYO hat, sunscreen
and camping chair.**

**Registrations for
multiple events
are welcome!**

**Stuart Andrews |
Forage Farms**
*at 'Mt Ball', 'Waterford'
and 'Junee'*

Stuart has spent over 30 years dedicated to researching, practicing and teaching land rehabilitation techniques including Natural Sequence Farming (NSF) and other regenerative agricultural models. Raised on the celebrated home of NSF 'Tarwyn Park', Stuart has delivered educational field days on NSF throughout Qld, NSW, Vic and the ACT since 2012.

**Bernie Claussen |
Fitzroy Basin Association**
at all locations

For nearly a decade, Bernie has been working with Fitzroy Basin landholders to help them retain and improve soil on their properties and manage active erosion sites. Bernie's insights and practical approach draw from her extensive experience in the field, including the delivery of more than 40 erosion rehabilitation projects with regional landholders across a range of land types.

**Misko Ivezich |
Aluvium Consulting**
at 'Hillview'

An environmental engineer, Misko brings a wealth of expertise and practical experience in hydrology and addressing active stream bank erosion. Most recently, Misko has been involved in developing solutions to remediate erosion caused by flooding events in south-east Queensland and north-east Victoria and build the resilience of affected systems in preparation for future flood events.

Contact the nominated officer for each event you would like to attend (contact details in blue box).

FOUR LOCATIONS

RSVP by Tuesday 10 April to:

'MT BALL' Rubyvale

Tuesday 17 April | 8:30am-3:30pm

Stacey Heidenreich
Grazing Industry Officer | CHRRUP

☎ 07 4982 2996

☎ 0428 776 249
