Help protect, restore and enhance our local pandanus population!

An introduced species is killing this iconic species along our coastline. Come along to any one of our three events and learn how you can help pandanus suffering in your backyard!

Join any one of our June events and learn about

- ✓ The local pandanus dieback situation and Byfield infestation
 - ✓ The ecological function of pandanus in coastal ecosystems
 - ✓ How you can help protect local pandanus populations
 - ✓ The biocontrol methods being used to manage this issue
 - ✓ Population and restoration methods
- plus loads more!*

Field days include

- ✓ Seed collection
- ✓ Direct seed planting
- ✓ Leaf stripping demonstrations

The guest presenter

Joel Fostin

ECOSYSTEMS MANAGEMENT & BIOSECURITY SOLUTIONS

Joel Fostin is the leading specialist, educator, researcher and advocate for the prevention of Pandanus Dieback. Working across coastal eastern Australia, Joel has upskilled and empowered many community members and councils to join his mission to manage and prevent pandanus dieback.

Australian Government

FITZROY BASIN ASSOCIATION

This project is supported by Fitzroy Basin Association through funding from the Australian Government's Reef Trust program.
