.....

### Learn more!

FBA works closely with local people to deliver solutions for a healthy environment. Learn more about FBA's services at

[fba.org.au](http://fba.org.au)

Join us to learn about pasture cropping (aka multi-species pastures) with expert Colin Seis. The workshops include a paddock walk at a local property looking at multi-species pastures. This is a great opportunity to learn how to get regenerative practices working on your central Queensland property.

Learn about:

- ✓ multi-species grazing and cropping
- ✓ pasture cropping
- ✓ grasslands and pasture
- ✓ soil health
- ✓ carbon
- ✓ nutrient cycling
- ✓ soil ecosystems
- ✓ ... and more!

### THE PRESENTER

### Colin Seis

Colin is a regenerative farmer best known for pioneering the pasture cropping technique (where a winter cash crop is sown into an existing summer-active pasture).

During these events Colin will discuss regenerative techniques (such as pasture cropping and multi-species pastures) and the flow on benefits for soil and business.

This project is funded by the Australian Government's Reef Trust with support from Fitzroy Basin Association.
