

# Breeder Management Two-Day Workshop

## Get the most out of your breeding herd!

Join fellow graziers for a two-day hands-on workshop. Learn how developing your pregnancy testing, herd, business and grass management skills will help you make better informed decisions.

### Learn

- ✓ How to improve the productivity of your breeding herd
- ✓ How to use preg-testing and fetal ageing information to make production, stocking rate and business decisions
- ✓ How to identify poor performing cows at the pregnancy testing stage
- ✓ How to balance animal production and pasture use to improve land condition and reduce run-off

### Guest speaker

#### Dr Ian Braithwaite

VETERINARIAN

Ian is a Veterinarian from Mt Isa providing specialist pregnancy testing services to producers across northern Australia. He is passionate about supporting the beef industry to become more sustainable by getting graziers to integrate their herd production systems with financial and ecological management to make better businesswide decisions.

The Water Quality and Soil Improvements in Grazing and Cropping Enterprises in the Fitzroy program is funded by the Australian Government's Reef Trust with support from Fitzroy Basin Association.
