Did
you know some of
the largest and healthiest
koala populations in
Queensland can be found
right here co-existing
with cattle grazing
operations?

The Clarke-Connors Range, located in central Queensland, contains one of the most significant koala populations in regional Queensland. Koalas are listed as endangered in Queensland, NSW and the ACT under the EPBC act. The species is in serious decline suffering from the effects of bushfires, road accidents, dog attacks and habitat destruction.

Remove Lantana

How do you make your property koala friendly?

Remove Weeds

Woody weeds like Lantana and Rubber Vine out-compete native plants, hinder koalas from reaching their food trees and increase fire fuel loads.

Control Feral Animals

Reduce threats from wild dogs and other feral animals that can harm koalas, paddocks and livestock.

Preserve or Plant Native Trees

Maintain trees in grazing areas to support koala habitat.

Manage Fires

Reduce the risk of bushfires affecting koalas by having an up-to-date property fire management plan.

Australian Government

This project is funded by the Australian Government's Saving Koalas Fund with support from Fitzroy Basin Association.

Benefits of creating a koala friendly property

Expand Grazing Land

Removing weeds like Lantana and Rubber Vine not only opens up more grazing space but may also reduce the intensity of bushfires and remove hiding spots for feral animals.

Enhance Livestock Safety

Controlling feral animals safeguards your livestock from predation, diseases, and parasites.

Boost Soil Health

Trees on your property increase the amount of water your soil can hold, nutrient levels, and soil stability. This provides cattle with shelter and helps prevent erosion.

Fire Protection

Effective fire management planning can help to shield your property, people, and livestock from intense bushfires.

Get involved!

Fitzroy Basin Association is working to improve and restore koala habitat. If you would like to be involved or would like to know more reach out to FBA Project Officer (Environment) Dr Mark Schultz at:

What can I do if I don't have a property?

- ✓ Report koala sightings using the Bio Collect App – *Scan this code to learn how!*
fba.org.au/step-by-step-instructions-for-downloading-and-using-the-biocollect-app/
- ✓ Slow down and keep an eye out on the roads!
- ✓ Report injured koalas ☎ 1300 264 625 – **1300 ANIMAL**
