

# Grazing for soil carbon

Resilience, profit & carbon neutrality

 **Tuesday 17 September 2024 | Time 10am – 3pm**

 **3351 Barfield Road, Banana QLD 4702**

Join Adam and Tracy Gunthorpe on their soil carbon journey and hear about their successful generation of carbon credits.

Learn about:

- grazing management and multi-species pastures to increase soil carbon
- the role of soil carbon projects to reach carbon neutral and new Meat & Livestock Australia (MLA) demo site
- how to participate in a soil carbon project.

The Gunthorpe's soil carbon project has generated 9214 ACCUs across 550 ha in two years.

Hear about the grazing practices used to build soil carbon and what's involved in implementing a soil carbon project.

Walk the MLA Producer Demonstration Site developed with soil carbon provider AgriProve.

The project aims to support red meat producers to understand the impact of soil carbon on the carbon intensity of their enterprise.

## Guest Speaker John Moor

**Grazing management and multi-species pastures for soil carbon**

John Moor is a biological farming expert with extensive experience in use of multi-species pastures and holistic grazing management to regenerate soils and maximise production.

## The day will also feature:

**Soil carbon journey and management practices**

– *Adam Gunthorpe, Gunthorpe Cattle Co.*

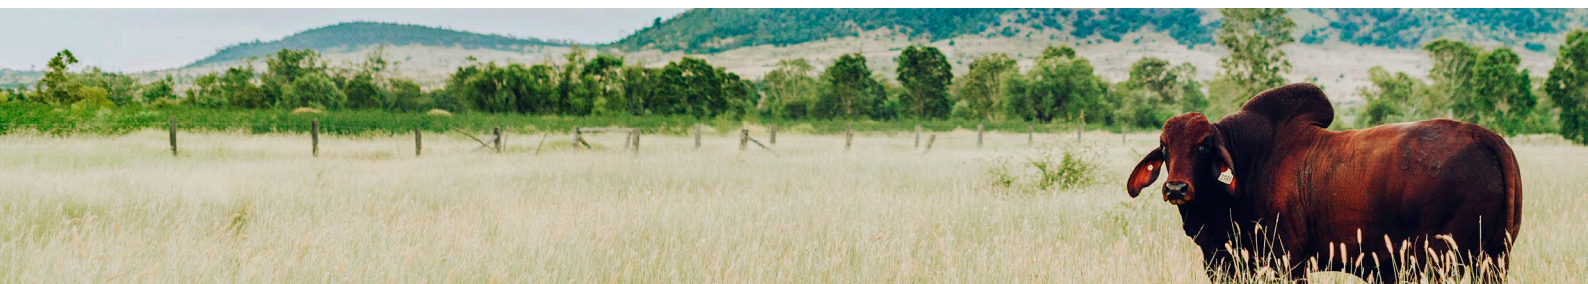

**Soil carbon projects and demo site overview**

– *Melanie Addinsall & Bill Hyem, AgriProve*

**MLA sustainability update** – *Julia Waite, Meat & Livestock Australia*

**Co-benefit opportunities** – *Verterra*

**Soil carbon sampling demonstration** – *Verterra*

Lunch provided
